Nutrition ATLAS Zimbabwe

Preface

Child Survival and development remain principal objectives if we are to realize and achieve the Millennium Development Goals (MDGs), and in doing so leave a legacy for which our children will thank us. Nutrition and maternal health are fundamental to achieving these goals.

Every year, it is estimated that undernutrition contributes to the deaths of 5.6 million children, worldwide, under the age of five. When nutrition falls short, damage is done to individuals and to society. When pregnant women are not adequately nourished, their babies are born at low weights, putting their survival at risk. When girls are undernourished, their future ability to bear healthy children is threatened. Unfortunately, Zimbabwe is not immune to the challenges of malnutrition, where HIV/AIDS and an economic crisis have combined to the detriment of children's nutritional status.

This Nutrition Intervention Atlas, developed by UNICEF in consultation with the Nutrition Technical Consultative Group and other stakeholders, provides an overview of the types of interventions that are being carried out in the field of nutrition and the implementing organisations in Zimbabwe during 2005-2006

The Atlas will serve as a planning tool for UNICEF and stakeholders to make further inroads toward Zimbabwe's realization of the MDGs. Within the context of the Nutrition Technical Consultative Group, this Atlas will be disseminated bi-annually in order to improve planning and implementation of nutrition programs in Zimbabwe.

The data for this Atlas was provided on a voluntary basis from different sources: Ministry of Health and Child Welfare National Nutrition Unit, the Food and Nutrition Council, non-profit organisations active in carrying out nutrition interventions (local and international NGOs, community based organisations and faith based organisations as well as UN agencies) and donor agencies.

UNICEF would like to take this opportunity to express appreciation to all who have contributed to the development of the Nutrition Intervention Atlas. In particular, we would like to thank the *Humanitarian Aid Department of the European Commission* (ECHO) for their financial support in the establishment of this Atlas. Special thanks also go to the Government of Zimbabwe and various organisations which have submitted information about their projects.

Dr. Festo P. Kavishe
UNICEF Representative, Zimbabwe
