

Intervention mapping for Nutrition in Zimbabwe

Who is doing what and where

Volume TWO

Fourth Edition (2008 - 2010)

Preface

Today, one in every three Zimbabwean children suffers from chronic malnutrition (Zimbabwe National Nutrition Survey, 2010). Globally, maternal and child under-nutrition contributes to 35 percent of all child deaths and 11 percent of the global disease burden. Applying these estimates to Zimbabwe, undernutrition is likely to contribute to more than 12,000 child deaths each year. The malnourished children that survive suffer life-long consequences – they are more susceptible to disease, and are more likely to have poor educational outcomes, poor birth outcomes, and reduced economic activity into adulthood. At the official launch of the 2010 National Nutrition Survey, the Prime Minister of Zimbabwe, the Right Honorable Morgan Tsvangirai, highlighted that an investment in nutrition is critical to the achievement of MDG's 1 (hunger and undernutrition) and 4 (child mortality), and will contribute to the achievement of MDGs related to maternal health, primary education, gender equality, and HIV & AIDS. Coordinated action at all levels is required to improve nutritional outcomes and secure the future of Zimbabwe's children.

The Nutrition Cluster in Zimbabwe was established in early 2008 to support the government of Zimbabwe in the coordination of efforts to achieve optimal nutritional status for all Zimbabweans. The cluster includes members from more than 100 organizations, representing local and international NGOs, donor agencies, UN agencies and Government departments. Cluster members are committed to the achievement of five intermediate results:

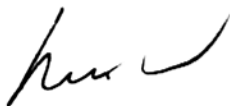

- Result 1: Improved situational analysis and planning within the nutrition sector;*
- Result 2: Improved information sharing and accountability within the nutrition sector;*
- Result 3: Improved technical capacity within the nutrition sector;*
- Result 4: Increased visibility and resources for programming that improves nutritional status; and,*
- Result 5: More effective programmatic response in the nutrition sector*

The Nutrition ATLAS that follows provides an overview of nutrition interventions undertaken by implementing organisations between January 2008 and June 2010. The atlas includes contributions from more than 141 organizations representing 311 separate projects throughout the country.

We would like to take this opportunity to express our appreciation and gratitude to the organizations and individuals that contributed to this year's Nutrition Atlas.

We hope that this ATLAS will contribute to more effective planning and action in the nutrition sector in Zimbabwe.

Sincerely,

Dr. Peter Salama
Representative, UNICEF Zimbabwe

George D. Kembo
Acting Director, Food & Nutrition Council

Ancikaria Chigumira
Deputy Director, National Nutrition Department

Organisations involved in Nutrition interventions in Zimbabwe

Planned and implemented Nutrition projects in Zimbabwe

1 ACTION CONTRE LA FAIM

Project title	Sustainable improvement of the food security among vulnerable rural population groups by optimising their capacity of production and focusing on involvement of partners and local actors
Type of project	Recovery, Rehabilitation, Reconstruction (3Rs)
Status of project	Project completed
Source of funds	EU
Grant recipient	Action Contre La Faim
Implementing org.	Action Contre La Faim
Project start/end date	Jul, 2006 / Jun, 2009
OVC Focus	No
Nr. direct beneficiaries	16,704
Geographical locations	Chipinge

		Beneficiaries
FOOD SECURITY	Food Support	General food distribution
		Food for work / Food for asset creation
		Institutional feeding
		School based feeding
		Chronically ill feeding
		Blanket supplementary feeding
	Gardens	Nut. / Herb gardens with inputs
		Nut. / Herb gdns with nutrition education
		Nut. / Herb gdns with inputs and nut. education
	Other	Small livestock
CARE		Other food related activities
		Exclusive breastfeeding
		Complementary feeding
		General nutrition education
		HBC/ART general nutrition education
HEALTH		Other care related activities
		PMTCT with infant feeding
		ART individual nutrition counselling
		Community-based Targeted supplementary feed
		Management of Acute Outpatient care
		Malnutrition (CMAM) Inpatient care
		Training on child health
		Diarrhoea management
		Micronutrient Fortification
		interventions Supplementation
Nutrition Surveillance		Other health related activities
		Surveillance
		Surveys

2 ACTION CONTRE LA FAIM

Project title	Enhance the livelihoods & living conditions of impoverished and vulnerable populations through a combined Food Security & WASH Approach
Type of project	Recovery, Rehabilitation, Reconstruction (3Rs)
Status of project	Under implementation
Source of funds	DFID
Grant recipient	Action Contre La Faim
Implementing org.	Action Contre La Faim
Project start/end date	Jul, 2008 / Apr, 2011
OVC Focus	No
Nr. direct beneficiaries	4,890
Geographical locations	Insiza, Umzingwane

		Beneficiaries
FOOD SECURITY	Food Support	General food distribution
		Food for work / Food for asset creation
		Institutional feeding
		School based feeding
		Chronically ill feeding
		Blanket supplementary feeding
	Gardens	Nut. / Herb gardens with inputs
		Nut. / Herb gdns with nutrition education
		Nut. / Herb gdns with inputs and nut. education
	Other	Small livestock
CARE		Other food related activities
		Exclusive breastfeeding
		Complementary feeding
		General nutrition education
		HBC/ART general nutrition education
HEALTH		Other care related activities

Type of project	Development
Status of project	Programme formulation & design
Source of funds	To be advised
Grant recipient	Nutrigain Trust
Implementing org.	Mutange AIDS Programme
Project start/end date	Jan, 2010 / Dec, 2011
OVC Focus	Yes
Nr. direct beneficiaries	500
Geographical locations	Gokwe South

		Beneficiaries
FOOD SECURITY	Food Support	General food distribution
		Food for work / Food for asset creation
		Institutional feeding
		School based feeding
		Chronically ill feeding
		Blanket supplementary feeding
	Gardens	Nut. / Herb gardens with inputs
		Nut. / Herb gdns with nutrition education
		Nut. / Herb gdns with inputs and nut. education
	Other	Small livestock
		Other food related activities
CARE		Exclusive breastfeeding
		Complementary feeding
		General nutrition education
		HBC/ART general nutrition education
		Other care related activities
HEALTH		PMTCT with infant feeding
		ART individual nutrition counselling
		Community-based Targeted supplementary feed
		Management of Acute Outpatient care
		Malnutrition (CMAM) Inpatient care
		Training on child health
		Diarrhoea management
		Micronutrient Fortification
		interventions Supplementation
		Other health related activities
Nutrition Surveillance		Surveillance
		Surveys
