# **Executive Summary**

The Food and Nutrition Council (FNC) is the lead agency under the Office of the President and Cabinet (OPC), tasked by Government with the responsibility of coordination, analysis and promotion of a cohesive national response by multiple sectors and stakeholders on food and nutrition insecurity in Zimbabwe.

The FNC 2019-2021 Strategy is a strategic document which provides the roadmap for the next 3 years. It outlines how FNC will undertake its mandate through its 9 Key Result Areas namely Assessment Research, Monitoring and Evaluation; Multi-Sectoral Coordination; Nutrition; Food Standards, Compliance and Innovation; Policy Analysis and Advice; Social Protection; Knowledge Management; External and Internal Stakeholder Management and Finance and Administration. The strategy outlines the costed 3 year workplan as well as the 2019 deliverables, which will serve as a guide to programme planning and implementation. The strategy will also serve as a resource mobilization tool to ensure that adequate resources (financial and technical) are availed to facilitate programme implementation.

The strategy outlines how FNC will, through its 9 Key Result Areas, facilitate sector work, enhance multi-sectoral collaboration, and harness multi-sectoral input towards addressing the prevailing food and nutrition challenges in the country. The Strategy aims to align food and nutrition response programmes to the current development agenda and help the Government to fulfil its developmental aspirations. Specifically, it is responding to the demands of the Transitional Stabilization Programme through consolidating and building on 10 years of food and nutrition achievements, producing building blocks for a society with sustainable middle income economy and intensifying multi-sectoralism at all levels. Secondly, it is rising to the Challenge of Devolution by advising sectors on the changing environment in order to guide how they must respond at all levels. It also acting as a driver on the road to Vision 2030 Middle Income Zimbabwe by advocating for industrialization with inclusivity.

It is our sincere hope that this strategy will light the way for the development and implementation of inclusive multisectoral policies and programmes that will address the prevailing food and nutrition challenges.

## **Section I: Context and Background**

### **1.1. Problem Statement**

The country is currently grappling with the triple burden of malnutrition characterized by: stunting at 26%; micronutrient deficiencies such as iron-deficiency anaemia, 60% in women of child bearing age and 45% in children under 5 years, vitamin A deficiency and iodine deficiency disorders and obesity. These have the potential to decelerate progress, if not taken into account in the plans for economic growth. The 2018 National Nutrition survey and the Urban Livelihoods Assessment, indicate that, whilst the proportions of children stunted is less in urban areas than in the rural areas, the trend in urban areas, has been increasing. The urban areas however, bear the burden of stunted children, because 50% of the total number of children that are stunted are found in the urban areas, where only 30% of the total population resides. Addressing urban stunting has therefore the potential to significantly lower the national average. Households in both urban and rural areas consume a very narrow range of foods, consisting largely of the staple maize, condiments, vegetables, oils and sugar, with very little consumption of animal protein and fruits. There is also a weak value chain for nutrient-dense foods (processed and unprocessed).

The non-communicable diseases (diabetes, obesity, cardiovascular diseases and cancers) are affecting able bodied and productive adults in their prime, reducing and curtailing their contributions to economic growth in the workplace, through morbidity and mortality. The potential increase in health costs because of the disease burden of diet and lifestyle related non-communicable diseases such as diabetes, cardio vascular diseases and cancers, will also take its toll on the economy since these diseases are affecting the population that is already contributing to the economy. The health sector's capacity to manage and treat these conditions is woefully inadequate. A targeted focus on promoting and protecting the well-being of the workforce, by preventing these nutritional problems, is warranted if the industry/private sector lead growth is to materialize and be sustained.

Evidence shows that the prevalence of food insecurity in urban areas increased from 37% in 2018 to 41% in 2019. The situation is further exacerbated by prevailing economic related shocks and challenges such as cash shortages, high food prices, health and funeral expenses, loss of employment and high fuel / transport costs and the ability of households to recover from these economic related shocks and challenges proved difficult compared to other shocks and challenges experienced. The majority of urban households are accessing safe water sources even though there are times when these households do not have water, thus supply is not always guaranteed. However, open defaecation (2.8%) is still an issue in urban areas defeating the global healthy cities initiative/approach.

The prevalence of food insecurity in the rural areas has increased from 28% in 2018 to 51% in 2019. WASH practices continue to be of concern across all provinces as a significant proportion of households was reported to be practicing open defecation.

The country was also hit by a cholera outbreak and the affected areas were Harare City, Chitungwiza, Buhera, Makoni, Gokwe North, Mutoko, Marondera, Murewa, Chikomba, Seke, Shamva, Wedza, Mutare City, Mazowe, Rushinga, Bulawayo City, Mt Darwin, Chiredzi, Gwanda and Mberengwa. As of 31 December 2018, a cumulative total of 10,630 cases of which 10,338 were suspected, 292 confirmed and 65 deaths were reported. Persistent challenges noted included erratic water supply, collapsed sewerage, over-crowding, co-infection as well as multi-drug resistance, among others.

Zimbabwe, like other Southern African countries, is projected to experience an El-Nino induced drought which will be characterised by poor and erratic rainfall. This phenomena will potentially wreak havoc on the country's agriculture season. The forecasted conditions are usually associated with agricultural risks which include limited water availability, poor grazing areas and heat stress that could affect both crops and livestock. Added to the impact the El Nino will have on the food production (availability and accessibility), it will also have an impact on the quality of diets which results in hunger and malnutrition. Higher food prices together with reduced income during drought severely impact the purchasing power and food diversity among the poor, leading to consumption of subsistence diets and thereby multiple micronutrient malnutrition.

Poverty continues to be one of the major underlying causes of vulnerability to food and nutrition insecurity as well as precarious livelihoods in Zimbabwe. According to the ZimSTAT Poverty, Income, Consumption and Expenditure Survey 2011/12 Report, about six in ten households in Zimbabwe were poor whilst 16% were deemed extremely poor. This is the context in which the FNC Strategy was developed with the aim of contributing in addressing the stated challenges.

### 1.2. Rationale and Assumptions of the Strategy

#### The Food and Nutrition Strategic Framework

The Strategy is framed around the following aspirations:

- Ensuring national food and nutrition security for enhanced Human Capital Development in Zimbabwe.
- Ensuring Economic Growth Policy interventions for improved food and nutrition security.
- Exploring/ understanding roles of food safety standards in production, processing, preservation and storage (farm to folk) in support of food and nutrition security.
- Advocating for Community Knowledge Systems to foster food and nutrition security (demand, supply and use).
- Food and nutrition being central within the devolution agenda (rising to the challenges/demands of Devolution).

- Developing building blocks for a society with sustainable Middle-Income-Country economy.
- Intensified multisectoralism at all levels

### 1.3. Purpose of Strategy Document

Informed by FNC's mandate, the purpose of this strategy document is to outline the FNC's goal over the period 2019-2021 and to detail a practical way forward for achieving this goal. The strategy document also estimates the approximate resources required to accomplish the agreed outputs.

The FNC will use this document to:

- Inform and structure work planning processes within the FNC
- Build coherence among partners (Government Ministries, UN agencies and NGOs)
- Mobilize resources for FNC's work
- Facilitate accountability, improve performance in the FNC and enable the FNC to become results-based.

While the document will be used as the most important planning instrument for FNC, it will be important that the FNC embraces a flexible approach and recognizes emerging work priorities and opportunities as they arise that are not necessarily referenced in this document. These emerging priorities and opportunities should be reflected as activities and results in relation to the given outputs.

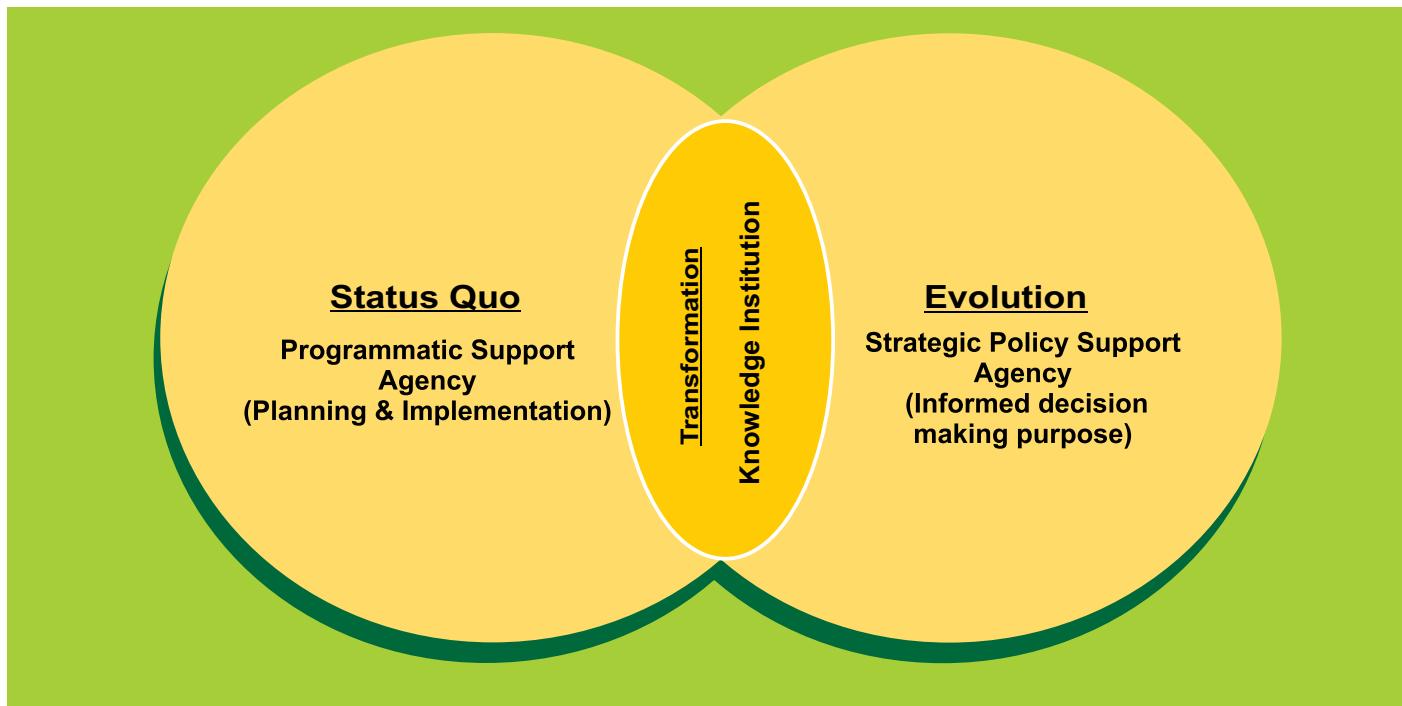

## **Section II: Vision and Mandate of Food and Nutrition Council**

### **2.1. Vision and Mandate of FNC**

**Vision:** To promote multisectoral response to food security and nutrition problems to ensure that **EVERY ZIMBABWEAN IS FREE FROM HUNGER AND MALNUTRITION.**

**Mandate:** FNC is mandated to “*promote a cohesive national response to the prevailing household food insecurity and malnutrition through co-ordinated multi-sectoral action*”. FNC, a Government department in the Office of the President and Cabinet engages with multiple Ministries and other stakeholders including the development partners and the private sector. FNC is well placed to lead and convene on national food and nutrition issues and works through and strengthens multi-stakeholder fora (Government and non-Government) at national and sub-national level. Specifically, it recognizes the role of decentralized multi-sectoral structures such as the Food and Nutrition Security Committees (FNSCs) as important at the sub-district, district and provincial levels.

The FNC's mandate is guided by the following framework which depicts the current functions of the FNC as a Programmatic Support agency transitioning into a Strategic Policy Support agency. The intersection of the two functions should work together to transition and position the FNC into the Food and Nutrition Security Knowledge Institution in Zimbabwe.

### 2.2. National Policy, Commitments and Legislation that Legitimize and Inform FNC's Role

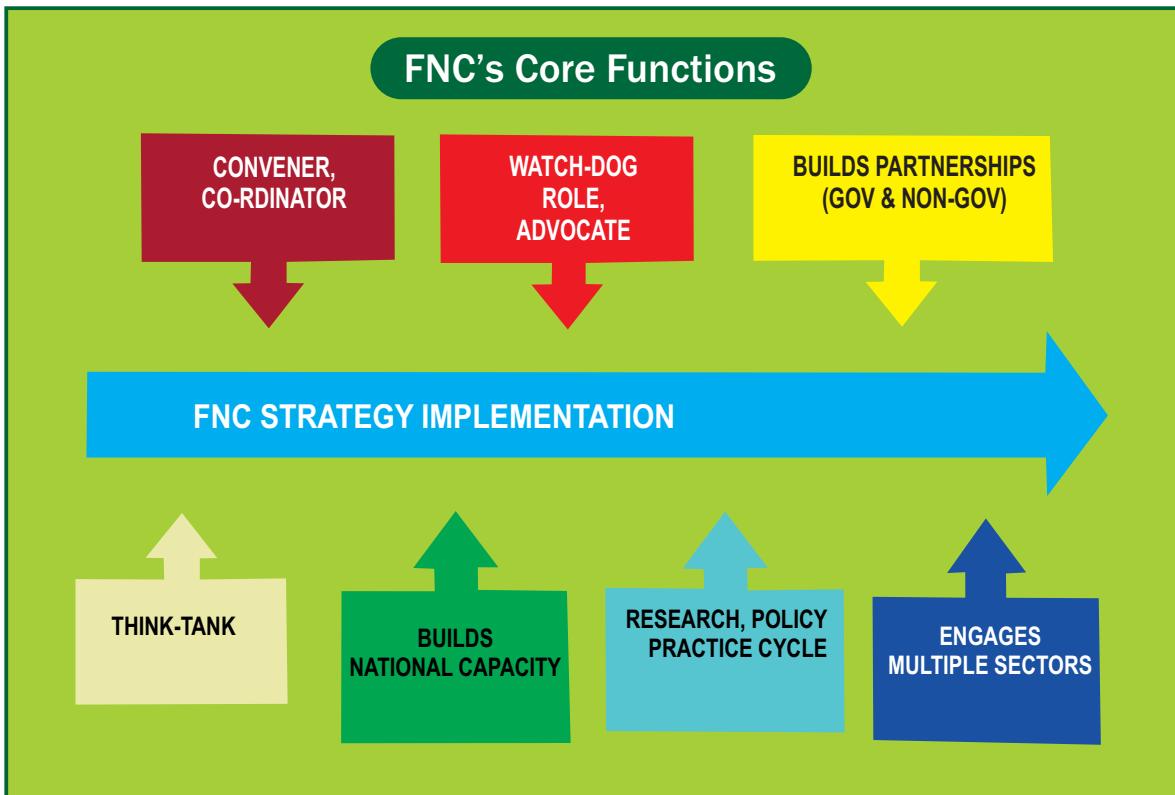

The work of FNC provides guidance for a practical way forward for fulfilling the following existing national commitments.

- The Zimbabwe Constitution recognizes the right to adequate food and nutrition coupled with access to basic health care and social services in terms of article 15 a, b and c; article 19 (2) (b), article 21 (2) (b) and article 77b.
- The Government of Zimbabwe (GoZ) has made commitments and sets itself national targets through the Sustainable Development Goals (SDGs) 2016-2030, ending hunger by 2030. The goal is a comprehensive programme to improve nutrition, agricultural production, food production systems, genetic diversity, investments, trade regimes, and food commodity markets.
- Government launched a Transitional Stabilisation Programme (TSP) in a bid to set the economy on a recovery path after years of stagnation. The TSP aims to operationalise Vision 2030 which seeks to transform Zimbabwe to become a middle-income country
- Zimbabwe is signatory to the legally binding International Covenant on Economic, Social and Cultural Rights (ICESCR). According to Article 11 of the ICESCR, “every human being has the right to adequate food and the fundamental right to be free from hunger”.

### 2.3. Core Business and Functions of FNC

The core business of FNC can be summarised as:

- Convenes, facilitates and co-ordinates national food and nutrition security issues in Zimbabwe
- Charts a practical way forward for fulfilling legal and existing policy commitments in food and nutrition security.
- Advises Government on strategic directions in food and nutrition security.
- Undertakes a “watch dog role” and supports and facilitates action to ensure commitments in food and nutrition are kept on track by different sectors through a number of core functions:
  - Undertakes food and nutrition assessments, analyses and research
  - Conducts advocacy and communication on food and nutrition security issues
  - Strategic policy analysis and advice
  - Promotes multi-sectoral and innovative approaches for addressing food and nutrition security
  - Supports and builds national capacity for food and nutrition security including at sub-national levels.

## 2.4. Capacity of FNC, Partnerships and Associated Structural Mechanisms

**Core capacity of FNC:** In order to fulfil its core business and functions, FNC requires a minimum number of highly qualified staff that cover technical expertise in assessment and analysis, policy analysis, economics, food security, food safety, knowledge management, social protection, nutrition, advocacy/communication and inter-sectoral programming. It is critical that FNC facilitates, coordinates and convenes and does not replace existing capacities in sector Ministries. Therefore, the FNC must have a minimum core capacity and staff numbers that intend to work with the relevant technical staff in both Government Ministries, UN and non-Government agencies. (**See Annex 3 for FNC organogramme**). Critical competencies and skills that are considered key for FNC staff include: facilitation, leadership, communication (writing and presentation), co-ordination, assessment, research, analysis and policy formulation.

**Strengthening Capacity in the FNC:** Capacity development of FNC and its sub-national structures at provincial, district and sub-district levels (**See Annex 4**) is an explicit approach throughout this strategy. Capacity will be strengthened based on a multi-faceted approach. This will include; external advisory capacity to FNC that is accountable to developing capacity, competency and results-based performance incentives for FNC staff (and multi-sectoral teams) combined with competency-defined training and additional support through expertise such as senior national consultants for specific tasks.

### **Working through Partnerships and Creating Mechanisms for Multi-Stakeholder Dialogue:**

FNC recognizes that to build technical and strategic consensus, maximize co-ordination, deliver results, facilitate and advocate for resources, it must ensure that there are adequate formalized multi-stakeholder fora which are inclusive, accountable and effective. These multi-stakeholder fora will include Government, NGOs, UN, donors, private sector and civil society. Given the multi-disciplinary nature of food and nutrition security, FNC will maintain strong technical linkages with multiple sectors. It will also prioritize strengthening its partnerships with national research as well as private sector partners.

### **Section III: Principles Underpinning FNC's Approach**

**Principle 1:** To drive a multi-sectoral and broad-based approach for analysis and action necessary to ensure food and nutrition security that is informed by a conceptual framework (**see Annex 5**).

**Principle 2:** To formulate policy and advice that is relevant to the changing socio-economic context in Zimbabwe

**Principle 3:** To promote fora and mechanisms for dialogue and consensus for analysis and action across sectors and partners engaged in food and nutrition security.

**Principle 4:** To strengthen and reinforce national capacity for food and nutrition security

**Principle 5:** To reinforce a dynamic, evidence-based and accountable approach to policy development and implementation in food and nutrition security

### **Section IV: Goal, Key Result Areas and Strategic Objectives**

**Goal:** To contribute to improved food and nutrition security in Zimbabwe through strengthened national capacity for situational assessments and monitoring, analyses, policies, interventions and mechanisms that facilitate relevant multi-sectoral approaches.

FNC will achieve this specifically through the following key result areas and strategic objectives:

## **Section V: Outputs, Activities, Inputs/Costs**

**Key Result Area 1:** (Assessment Research Monitoring and Evaluation) Co-ordinates food and nutrition security information and analysis, within the context of a national food and nutrition information system, that is credible, scientific, relevant, transparent and timely and that informs multi-sectoral actions to address food and nutrition security.

Through the Assessment, Research, Monitoring and Evaluation Unit (ARME), FNC will lead and co-ordinate the implementation of a structured food and nutrition security information system that provides a timely and robust analysis of the food and nutrition security situation to inform action including advocacy, resource mobilization, policy guidance and programmes. The system will comprise of broadly five components including baseline assessments, annual assessments, early warning and surveillance, rapid assessments and research. FNC will aim to ensure that wherever possible, food security and nutrition security will be interpreted together, using secondary data where possible. It will aim to provide synthesized analyses of findings in quarterly bulletins. FNC will ensure that ZimVAC, as a multi-stakeholder technical advisory committee functions effectively to ensure consensus and collaboration on design, implementation and analysis of results. FNC will establish a repository of all food and nutrition security information.

**Strategic objective 1.1:** To provide reliable and timeous information through design and implementation of high quality assessments, surveys and surveillance systems for evidence based policy formulation, programming and targeted interventions.

**Strategic objective 1.2:** To co-ordinate and convene the design, implementation, analysis and production of timely national food security and nutrition security assessments and surveillance tools including the production of quarterly “bulletins” synthesizing the food and nutrition security situation.

**Strategic objective 1.3:** To create knowledge through academic and operational research in collaboration with national research bodies to inform and provide policy guidance on emerging food and nutrition issues as well as develop and promote context specific and evidence based best practices in food and nutrition security

**Strategic objective 1.4:** A monitoring and accountability framework designed and implemented for food and nutrition.

**Key Result Area 2: Multi-Sectoral Coordination:** Promote multi-sectoral approaches to addressing food and nutrition insecurity through strengthening national systems and structures at all levels (national, provincial and district) and through promotion of programme innovation and best practice.

FNC, through its Multi-Sectoral Coordination unit, will facilitate and strengthen capacities (training, evidence, documented best practice) and structures (e.g. Food and Nutrition Security Committees at provincial, district and sub-district levels) to support multi-sectoral approaches to food and nutrition security. The Unit will contribute to developing systems and evidence to demonstrate the impact of multi-sectoral approaches for the purpose of learning and scale-up.

**Strategic Objective 2.1:** Ensure that the capacity development and strengthening of national structures, coordination mechanisms and national staff capacity for all relevant sectors is strengthened through both pre-service and in-service training using nationally standardized training materials and procedures and is an explicit component of food and nutrition security interventions

**Strategic Objective 2.2:** Ensure that the significant potential and capacity of communities in ensuring food and nutrition security is recognized and that communities are themselves encouraged and promoted to play a critical role in identifying and responding to food and nutrition security.

**Strategic Objective 2.3:** Ensure that the social and cultural factors affecting food and nutrition security are systematically recognized and reflected in food and nutrition security strategies, including distinguishing the different roles and responsibilities that men, women and the elderly have in food and nutrition security.

**Key Result Area 3: Nutrition:** Strengthen the coordination and implementation of evidence based nutrition specific and nutrition sensitive interventions that are integrated within a broad public health framework.

The FNC through the Nutrition Unit will coordinate the implementation of multisectoral nutrition sensitive programming particularly to reduce undernutrition by adopting a nutrition specific and nutrition -sensitive approach across all programming. The thrust will also include addressing chronic undernutrition as a specific priority, building on the results of the latest research on the importance of and best means for promoting nutrition, particularly for vulnerable groups. The responses will recognize that malnutrition is a multi-faceted problem, with causes across a number of sectors. The FNC recognises that each sector is necessary but not sufficient alone. Achieving a sustainable decrease in malnutrition rates requires an integrated response. A multi-sectoral nutrition strategy and

guidance documents will be developed to ensure roadmap and evidence –based programming from defined actors. FNC will ensure commitments and visibility of Zimbabwe in global and regional platforms like, REACH, SUN, UN, WFS, ECSA, AUC, SADC among others. The FNC will develop nutrition advocacy and communication messages so that interventions from different sectors can reach the communities, households, and individuals for informed decisions and behaviour change.

**Strategic Objective 3.1:** Ensure nutrition sensitive policies, strategic alliances and community mechanisms reflect and reinforce broad-based multi-sectoral approach to address malnutrition

**Strategic Objective 3.2:** Promote innovative approaches in food and nutrition security promoted and scaled up

**Strategic Objective 3.3:** Ensure that Zimbabwe is informed by, engaged with and is contributing to global policies and initiatives and learning on national structures/mechanisms to support scaling up nutrition

**Strategic Objective 3.4:** Ensure the most vulnerable are prioritised and have access to nutrition services

**Key Result Area 4 (Food Standards, Compliance and Innovation):** Strengthen FNC's role of coordinating, supporting and ensuring multi-stakeholder and multi-sectoral adherence to national and international food safety standards including through promoting innovative approaches to locally produced products

Adherence to food safety and standards, at all levels from food production, processing and packaging, is critical towards ensuring food and nutrition for the whole population. Furthermore, innovation of locally produced food products may potentially enhance food and nutrition security. In the context of economic growth and development, within Zimbabwe, these aspects of work are extremely relevant.

**Strategic Objective 4.1:** To facilitate the establishment and effective functioning of a multi stakeholder National Food Standards and Safety Coordinating Committee for coordination of food safety programmes and strengthening public private partnership in food safety issues

**Strategic Objective 4.2:** To advocate for and influence the review of Food Control systems in Zimbabwe including the revision of the regulatory framework to ensure an effective implementation of food control activities

**Strategic Objective 4.3:** To facilitate promotion of the adoption of the 'farm to fork approach' in ensuring food safety and quality at each level of the food supply chain

**Strategic Objective 4.4:** To strengthen multi-stakeholder and multi-sectoral adherence to national and international food safety standards.

**Strategic objective 4.5:** To facilitate the promotion food and nutrition security through WASH support initiatives

**Key Result Area 5: Policy Analysis and Advice:** Promote food and nutrition security on the broader national economic and development agenda through strategic policy analysis and advice.

FNC, through its Policy Unit, will ensure that appropriate policy guidance and advice is developed based on robust analysis and evidence and is informing broader socio - economic planning and decision-making. FNC will use the Food and Nutrition Security Policy as a significant framework and set of commitments to co-ordinate a national food and nutrition response in the country and to track and follow-up on associated accountabilities, including at sub national level. The Policy Unit will facilitate policy and strengthen links between Zimbabwe and relevant Regional and Global policy initiatives.

**Strategic Objective 5.1** Advocate and promote policies that encourage local, national and regional markets to be fully functional; accessible to all food producers, food traders and food industry as well as mitigate the negative consequences of global and regional and national rise in food prices.

**Strategic Objective 5.2** Promote and facilitate the integration food and nutrition security issues by multiple sectors as reflected in National strategic polices, documents, legislation and institutional frameworks including implementation and scale-up of interventions which have proven effectiveness

**Key Result Area 6: Social Protection:** Strengthen the role of FNC in ensuring that were social protection including social assistance programmes are implemented they must contribute and enhance the food and nutrition security of the most vulnerable in short and medium term

The Social Protection Unit's primary objective is to ensure that a social protection framework is developed that facilitates a greater level of predictability, provides scope for impacting on chronic hunger and vulnerability and increases ownership by Government and accountability to its citizens. It also aims to provide substantive research and analysis, assist with the preparation of Policy briefs, and work directly with senior Government officials in support of efforts to assist the government of Zimbabwe with implementation of the national social assistance programmes. The unit will contribute to ensuring that where social protection, including social assistance programmes, are implemented, they must contribute and enhance the food and nutrition security of the most vulnerable in the short and medium

term to enable communities to become productive and more resilient to future shocks.

**Strategic Objective 6.1:** Ensure that all social assistance programmes are designed and implemented within a longer-term framework, including a means to ensuring that people's livelihoods, household economic security and resilience to cope with future shocks are strengthened.

**Strategic objective 6.2:** Ensure that all social assistance programmes are aligned with relevant social protection policy frameworks and have an integral component that enhances food and nutrition security.

**Strategic objective 6.3:** Ensure that social assistance programmes reinforce community ownership and that social assistance strategies aim at strengthening existing social support structures, (i.e., social capital), thereby reinforcing community capacity to reverse food and nutrition insecurity.

**Key Result Area 7: Knowledge Management:** Strengthen the role of FNC in facilitating the development and implementation of a robust multi-sectoral food and nutrition security knowledge management system.

Through the Knowledge Management unit, FNC will strengthen the development of a robust multi-sectoral food and nutrition knowledge management system. This system will facilitate the creation, dissemination, storage and application of knowledge at all levels. Central to this work is the strengthening of capacity at all levels to ensure a coordinated approach among stakeholders.

**Strategic Objective 7.1:** To strengthen knowledge management capacity among food and nutrition stakeholders.

**Strategic Objective 7.2:** To facilitate thematic based technical papers on food and nutrition security.

**Strategic Objective 7.3:** To establish an effective knowledge management system on national food and nutrition security.

**Key Result Area 8: External and Internal Stakeholder Management:** Increase awareness of food and nutrition security issues and FNC Mandate among stakeholders through innovative and strategic advocacy and communication approaches.

The FNC, through its Stakeholder Relations Management Unit, will aim to increase awareness of food and nutrition security issues in Zimbabwe through innovative and strategic approaches of information sharing and communication on specific priority issues using multiple media. The Unit will also support the dissemination of information of the food and nutrition security situation. Together with the Policy unit, it will advocate high level authorities to ensure that food and nutrition security is kept high on the agenda. The Stakeholder Relations Management Unit will ensure that all FNC partners are informed and aware of what the FNC aims to do and what it has achieved.

**Strategic Objective 8.1:** To increase awareness on food and nutrition security.

**Strategic Objective 8.2:** To coordinate advocacy and communication capacity enhancement activities among food and nutrition security structures (national, provincial, district and ward levels) by 2020.

**Strategic Objective 8.3:** To create and maintain a favourable public image for FNC by communicating programmes, accomplishments and points of view to stakeholders by 2020.

**Strategic Objective 8.4:** To strengthen the FNC internal stakeholder management and practice.

**Key Result Area 9: (Operational Capacity)** Ensure that FNC has the appropriate systems and operational (administration, IT, financial and logistics) capacity and systems in place to fulfil its mandate.

The FNC must have the capacity and systems in place to perform effectively. A performance and competency based system will facilitate and encourage delivery of results and high-quality work by all staff. Robust administrative and financial systems will allow the FNC to work with partners in a transparent and accountable manner. All equipment and assets will be maintained and protected to ensure it is effectively used for work purposes.

**Strategic Objective 9.1:** To ensure a supporting working environment which promotes consultations, collaborations, flexibility, teamwork and training.

**Strategic Objective 9.2:** To provide complete financial and administration services in an efficient and

effective way in support of programme execution.

**Strategic Objective 9.3:** To strengthen the Food and Nutrition Council's human resources and capital capacity.

**Strategic Objective 9.4:** To provide adequate logistics to support Food and Nutrition Council core functions.

## **Section VI: Work Plans 2019-2021**

**KRA 1:** (Assessment Research, Monitoring and Evaluation): Coordinates food and nutrition security information and analysis, within the context of a national food and nutrition information system, that is credible, transparent, scientific, relevant and timely and that informs multi-sectoral actions that address food and nutrition security
